

Experiment:27

Develop a C program for simulating the function of ls UNIXCommand.

Code:

```
#include <stdio.h>

#include <string.h>

int main()
{
    char fn[100], pat[100], temp[200];
    FILE *fp;
    printf("Enter file name: ");
    scanf("%99s", fn);
    printf("Enter the pattern: ");
    scanf("%99s", pat);
    fp = fopen(fn, "r");
    if (fp == NULL)
    {
        printf("Error opening file.\n");
        return 1;
    }
    while (fgets(temp, sizeof(temp), fp) != NULL)
    {
        if (strstr(temp, pat) != NULL)
        {
            printf("%s", temp);
        }
    }
}
```

```
fclose(fp);  
return 0;  
}
```

Output:

```
Enter file name: example.txt  
Enter the pattern: c  
Error opening file.  
  
...Program finished with exit code 1  
Press ENTER to exit console.
```
