

### Experiment 30:

Write C programs to demonstrate the following thread related concepts.

Code:-

```
#include <stdio.h>

#include <stdlib.h>

#include <pthread.h>

void *func(void *arg)

{

    printf("Inside the thread\n");

    pthread_exit(NULL); }

void fun() { pthread_t ptid;

pthread_create(&ptid, NULL, &func, NULL);

printf("This line may be printed before thread terminates\n");

if (pthread_equal(ptid, pthread_self()))

{

    printf("Threads are equal\n");

}

else

{

    printf("Threads are not equal\n");

}

pthread_join(ptid, NULL);

printf("This line will be printed after thread ends\n");

}
```

```
int main()

{

fun();

return 0;

}
```

**Output:**

```
This line may be printed before thread terminates
Threads are not equal
Inside the thread
This line will be printed after thread ends

...Program finished with exit code 0
Press ENTER to exit console.█
```
